Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method for video recording. The independent claims identify the features of "recording or not video signals including frames before or after a frame in which an inquiring face image appears for designated minutes when identification between an inputted face image and said inquiring face image was successful". Furthermore, the independent claims identify the feature "recording or not recording the audio signals in the picture signals for predetermined minutes from certain minutes before the time when identification was successful to after the time at the case that the identification was successful". The closest reference, Lin discloses an adaptive facial recognition system and method, either singularly or in combination fails to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wang discloses a person identifier and management system.

Lin discloses an adaptive facial recognition system and method.

Kim discloses a system for searching a particular character in a motion picture.
